To Whom It May Concern:

I would like to highly recommend David Sevier for a teaching position in your school district. David is currently licensed in Nevada to teach physical education, health, and drivers education. He also has classroom experience in all three areas.

Even though I cannot vouch for his classroom demeanor, I have seen David numerous times in a coaching type setting and I have been impressed to say the least. Much of coaching is also teaching and I believe David's expertise and enthusiasm in the coaching arena would carry over in a similar fashion to the classroom. The professionalism he uses in communicating and teaching the skills and techniques necessary to his young athletes are very impressive as the young athletes generally respond in a positive manner. We all know that to be a productive teacher and coach one needs to be well organized with structure, discipline, punctuality, responsibility, and enthusiasm and these are all qualities that David possesses in abundance.

In addition, David is involved in the full mission of the school through his coaching responsibilities. He has coached three sports with full commitment to each and with a well rounded background in each to be successful. He has coached football, wrestling, baseball, and girls' flag football, and was selected by his peers to be the President of the Flag Football Coaches Association of Southern Nevada. A position he served in for two years.

In closing, I endorse David Sevier for a teaching / coaching position in your school district as I believe he is a credit to any school that hires him. Through my own experiences with David I believe you will be getting an extremely hardworking and dedicated teacher and coach that strives for perfection and results and is a great role model as well. I would not hesitate to bring him on to my own staff if we had a teaching position available at our school in the areas in which he is licensed. Since we don't have a teaching position David must look elsewhere which is our loss.

Respectfully,
